Objective

I am a JavaScript/Python web developer and Y Combinator alum. I am seeking a web development position with a focus on creating highly interactive user experiences.

Relevant Experience

WizzyWig, Inc. 2013 - Present

Founder, CTO, Front-End Developer

- **Y Combinator** Class of Summer, 2013
- Launch Hackathon March 2013 Grand Prize Winner
- Developed the user interfaces using JavaScript and Backbone for our web applications
- Built a JavaScript drop-in library to allow users to make instant updates to their sites
- Built a drag and drop web page builder tool called Designly
- Built a single page rich text editor and content organizer, allowing for creating a page hierarchy and writing content for pages all from the same screen

BNY Mellon 2006 - 2013

Intern, Leadership Development Associate, Project Manager, Collaboration Manager

- Developed a real-time web application on top of Microsoft SharePoint for content management and user event registration
- Led organization-wide presentation series and hosted one session on an introduction to JavaScript programming
- Oversaw BNY Mellon's Collaboration strategy rollout of Microsoft SharePoint and IBM Connections
- Set development priorities for the technical team and designed solutions with them
- Worked with users to market our collaboration tools, increase adoption, and identify necessary enhancements
- Wrote queries generating client accounting reports
- Developed Java Server Pages web application for employee access management workflow. Utilized Java, JavaScript, and Oracle database via SQL.
- Performed QA and UAT on an access management application

Skills & Education
